Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software.

AIM

To create and configure a virtual machine using VMware Type-2 virtualization software with 1 CPU core, 2 GB RAM, and a 15 GB virtual hard disk.

ALGORITHM

1. Open VMware Workstation on the host computer.
2. Select Create a New Virtual Machine.
3. Choose the installation method and select the Ubuntu ISO file.
4. Select Linux as the guest operating system and enter the virtual machine name.
5. Set the virtual hard disk capacity to 15 GB.
6. Customize the hardware settings by allocating 1 CPU core and 2048 MB RAM.
7. Click Finish to create the virtual machine.
8. Verify the CPU, memory, and disk configuration.

OUTPUT

RESULT

Thus, a virtual machine was created and configured successfully using VMware Type-2 virtualization software with 1 CPU core, 2 GB RAM, and a 15 GB virtual hard disk.
